RECENT EXPERIENCE

Fullstack Javascript Developer

Code for America, San Francisco, CA - 2015-present

Led the development on 3 separate web applications improving national farmers efficiencies across the nation. Utilized Flask, AngularJs, and Postgres. Our applications Acres and Farmer's raised awareness about the opportunities for current and aspiring farmers to start growing food in the city.

Fullstack Javascript Developer

i-comm tech, San Francisco, CA - 2013-2015

I was the sole front-end / UI developer, as well as an ambassador for the company in the local tech scene. I attended client pitch meetings and prototyped, then built applications for their needs. Additionally, I worked with the company's CEO to establish the first maker-coworking space in Puerto Rico (Engine 4), turning unused office space into a daily hub for makers and technologists.

Past Experience

Psychologist

Team leader in multidisciplinary health group, psychometric evaluations and treatment strategies planning.
